

June 30, 2010

It has been almost 1 year since we contacted Todd Albert Homes to design and build a master suite addition onto the lower level of our two story home in Charbonneau / Wilsonville, OR. The addition consists of a large master bedroom, large walk-in closet, walk-in shower and double vanity bathroom area.

We had extensive tile work in the bathroom/shower/closet areas and hardwood floors in the master bedroom area along with many windows and a door to the outside patio area. The main and original concern before starting this project was that the roofline would not reflect an add-on look as many other additions have in our neighborhood. If you drive by the house now either from the street behind the house or from the front you will see that our goal was accomplished. The house looks like it was built this was upon original construction 20 years ago.

The project went smoothly from all aspects beginning with excavation. The subs that were used by the contractor, (roofing, plumbing, tile, and staining hardwoods) were timely and did great work. All subs that were around our home were clean, polite and quick. The builder was in constant contact with them and us daily, as he is a hands' on contractor completing the building, hardwood floor laying and window setting himself with his small but efficient crew. This contractor also has a painting company that did all of the painting as well as some others areas in our home at the same time. Again clean, quick and professional.

This project was done to provide a space for my mother, and all workers were courteous of her and her disabilities. The project came in on time and with the suggestions I was given also came in under budget.

We now have an area that is not only functional but truly a beautiful space to show off and an added extreme value to our existing home should we ever decide to leave it.

We would gladly call upon this contractor for any other projects we might undertake in remodeling the remainder of our home. This contractor has our permission to give out our name and number for any further questions regarding any aspect of my project.
